

Utilities and communication companies use pole tags to visibly mark utility poles. These tags are provided in aluminum which resists weathering and makes the embossed letters highly legible. The one piece construction will not separate or crack in extreme temperatures.

Uses:

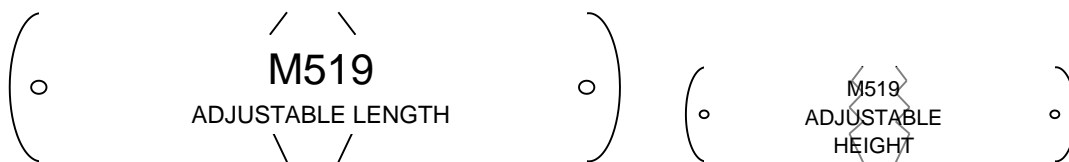

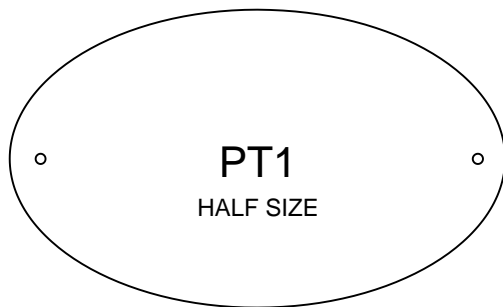

Identify light standard and utility poles
Equipment and Machinery

Materials:

- .020 aluminum
- .020 brass

Sizes:

- PT1- 5-3/16" x 3-1/8" (oval shaped)
- M519- 3" x 10" (*this is an adjustable tag – from a minimum width of 3/4" to 1-1/2" and a minimum length of 3" to 10"*)

Holes:

PT1 – 2 holes 1/8" diameter on 4-7/16" centers
M519 – 2 holes 1/8" on each end

Text:

Embossed (raised) letters and /or numbers are sized to fit. Text and embossed borders are painted black leaving plate with its natural background. *This method offered only on PT1 and PT2.* Other colours available are blue, red or green.

LOGOS, ADDITIONAL COLOUR or SPECIALTEXT AVAILABLE BY QUOTATION.
