

Printed tags are available in two different styles. First is a tag with an electro-galvanized core, covered with white paper which provides a durable tag that will not tear or wrinkle, the second is a bare metal tag available in various colours most suitable for colour coding. These type of tags typically have information printed in a form-style layout. Variable information can be hand written onto the tag with a marker, a hand stamp or mechanically marked by embossing.

Uses:

- Identify raw materials
- Record and track work in progress
- Identify bundles, reels and coils
- Warning, Shipping and Instruction Tag

Tags are also available blank with or without brass eyelets.

Materials:

- .008 electro-galvanized steel
- .008 enamel coated steel (**only available in 3" widths** in these colours: red, orange, yellow, green, blue and white)
- Other materials available by request.

- Widths: 2", 2-3/16", 2-1/2" or 3"
- Lengths: 2" to 5-3/4"

Holes:

1 or 2 end holes or strapping slots

Sizes of round holes: 1/8", 3/16", 1/4", 5/16", 3/8"

Sizes of slotted holes: 1/4" x 13/16", 1/4" x 1-3/8"

*Attachments: 1 or 2 Brass eyelets 1/8" dia
Tying wires .015 x 15" long (supplied unattached)*

Text:

Tags can be ordered blank or printed. Obtainable with one or two colours printed on front or back. The paper and bare metal surfaces accepts ink readily which allows for clear legible characters as small as 1/16". The printing colours available are: red, orange, yellow, green, blue, brown or black. **Embossed sequential numbering available on bare metal only.**

LOGOS, ADDITIONAL COLOURS or SPECIAL TEXT AVAILABLE BY QUOTATION

*For attachments see page 14 for appropriate **Fastening Device***
